

CHAMBER FOR MANUAL BLASTING Sand blasting and blast cleaning machine

Air Blast P-200 (ABSC 2452)

“STRIMONA STROY” LTD possesses a camera for manual blasting of industrial metal elements. The chamber size is: 3x6x15m.

TECHNICAL SPECIFICATIONS

Type		Air Blast P-200 (ABSC 2452)
Maximum air pressure input	bar	12
Minimum operational pressure	bar	6
Temperature range for operation	°C	-10 bis +50
Volume of the vessel for abrasive	l	200
Diameter of the vessel for abrasive	mm	409
Height of the machine	mm	1370
Cleaning	kg	135

The chamber complies with the requirements of the standard for steel cleaning through blasting – EN ISO 8501-1 Class Sa2.5

Figure 1- Contaminated metal

Figure 2 – Cleaned metal class Sa2.5

Sa2.5 (Very deep cleaning):

When viewed without magnification, the surface should be free from visible oil, grease, rust, dirt, dust, paint coatings and foreign matter.

All other traces of contamination could leave only slight marks in the form of spots or stripes.
