

Automatic shot blasting chamber P 1600 x 500

with dust separator system PF16

TECHNICAL CHARACTERISTICS

Type		Shot blasting machine P-1600x500	
Working width for sheet material	mm	1600	
Max. height of the profile	mm	500	
Speed of the roller conveyor	m/min	0,6-3,0	
Capacity of loading	kg/m	1000	
Number of turbines	pcs.	4	
Power of the turbine	kW	15	
Type of surface abrasion	mm	Air blowing	

The automatic chamber meets the requirements for the standard of blast-cleaning EN ISO 8501-1 Sa2.5 class

Figure - Untreated material

Figure 2 - Treated material Sa2.5 class

Sa2.5 - (Very thorough blast cleaning)

The surface should be free of visible oil, grease, rust, dirt, dust, paint coatings, and foreign materials when looking without expansion.

Every other traces of contamination must be seen only as stains or strips.
